

IP Restrict

Access to Online Banking can be limited to a specific IP address or range of IP addresses. IP Restrict set up on an Online Banking profile ensures that the online access is limited to location(s) that has been specified.

IP Restrict is available to all consumer and business Online Banking users that have a static public IP address or range of addresses. Contact Bank of American Fork Customer Service toll free at 1-800-815-BANK (2265) to enable IP Restrict.
